ESTELITE ASTERIA universal composite system
is focused on simplified restorative therapy
and outstanding aesthetic results

BUY 4 + GET 1 FREE

ESTELITE ASTERIA introduces a new simplified 2-step
layering concept. This comprehensive system is comprised
of minimal shades; just 7 Body shades and 5 Enamel
shades cover the entire dental shade range.

Benefits
Outstanding Aesthetics Invisible Margins,
Superior & Long Lasting & Gloss Retention

Simplified Layering

Optimal Handling Non-Stick & Easy to Sculpt,
Ample Working Time (90sec. under ambient light (10,000 lux)

Body Shades
The Body shades have excellent blending ability with less width of
margin bevel thanks to their state-of-the-art optical properties. The
Body shades provide some translucency with sufficient opacity to
avoid shining through without the use of opaque or dentin shades.
A1-B-A4B shades blend with most natural dentition.
The supplemental Body shade BL is recommended for high value
bleached teeth and B3B is for yellowish teeth.

Enamel Shades
The Enamel shades have compatible translucency as a substitute for
natural enamel. The primary use of NE shade is for the anterior teeth
and OcE is for the posterior occlusal area. The supplemental Body
shade TE is for highly translucent anterior teeth, WE is for whitissh
enamel and YE is for discoloured orangish enamel.

$99.00 SYRINGE $79.00 PLT PACK 15
TOKUYAMA SHIELD FORCE PLUS
Protective sealant for treatment of hypersensitive dentin. Tokuyama® Shield Force Plus is a one-component, single application, light-cured protective sealant designed for the treatment of hypersensitive dentin. Tokuyama® Shield Force Plus effectively infiltrates and seals exposed dentinal tubules to inhibit the flow of fluid through the tubules which is the cause of sensitivity. At the same time the durable coat of cured Tokuyama® Shield Force Plus helps prevent loss of dentin due to abrasion and/or erosion of exposed cervical dentin.

Features & Benefits
- Immediate and effective relief dentinal sensitivity that lasts up to 3 years
- Double Block technology that seals dentinal tubules for immediate relief and creates a second coating that prevents wear
- Relief of pre-op and post-op sensitivity in major restorative procedures
- Simple 1 time, 30-second procedure
- Use before any bonding procedure to improve bond strength
- Superior sealing of prepared teeth protects against bacteria and contamination
- Applies green and cures clear to ensure accurate placement

Indications
- Treatment of hypersensitivity caused by gingival recession and cervical erosion
- Alleviation and/or prevention of tooth sensitivity after tooth preparation for direct and indirect restorations
- Reduction of abrasion and erosion of exposed dentin

Up to Three Years of Pain Relief in 30 Seconds Flat
Shield Force Plus provides instant relief that lasts up to three years with a simple 30-second application procedure. Its green colour enables accurate placement of the solution on the affected area. Once air-dried and light-cured for 10 seconds, the material becomes clear.

BOND FORCE REFILL & PEN
Tokuyama Bond Force is a 7th generation single component, self-etching, fluoride releasing bonding agent. Tokuyama Bond Force creates a 3-D link to the tooth generating an extremely strong bond to enamel and dentin. Tokuyama Bond Force requires only 1 application, and is designed to be used on both cut/uncut enamel and dentin.
Tokuyama Bond Force is available in bottle or unit dose.

Indications
- Bonding of light- or dual-cured composite material to:
  - Cut/uncut enamel,
  - Cut/uncut dentin,
  - Fractured porcelain/composite for repair.

Benefits
- Outstanding bond strength
- Designed for cut/uncut enamel and dentin
- Only 1 application required
- No etching, No rinsing, No mixing
- Fluoride releasing
- Thin film thickness
- Less technique sensitive
- Available in both bottle and unit dose

HELIOMOLAR

The universal composite Heliomolar is suitable for use in both anterior and posterior teeth. This clinically tried-and-tested product has been used more than 80 million times over since it was introduced. There are very few dental restoratives in the world on which so many successful in-depth studies have been conducted. The microfiller formula of Heliomolar imparts outstanding polishing properties to the material.

**Advantages**
- Excellent adjustment of the shade (chameleon effect)
- Eleven shades, two of which are translucent enamel shades. Excellent shade stability
- High radiopacity
- Exceptionally low wear
- Low polymerisation shrinkage
- Continuous fluoride release
- Available in Syringes and Cavifils

$132.00 SYRINGE  
$195.00 CAPSULES

TETRIC EVOCERAM

Tetric EvoCeram, the composite restorative offering a balanced combination of properties. Tetric EvoCeram is a light-curing, universal nano-hybrid composite for top quality standard restorations in the anterior and posterior region.

**Benefits**
- Polymerisation on demand (POD): A long working time, combined with a short curing time
- Natural shade blend: Coordinated light reflection indexes of fillers, monomer matrix and nano-colour pigments
- Proven clinical performance: 150,000,000 restorations have been placed worldwide

$159.50 CAPSULES  
$110.00 SYRINGE

VARIOLINK ESTHETIC LC REFILL 2G

Variolink Esthetic is a light-curing luting composite for the aesthetic and permanent cementation of ceramic and composite resin restorations. This material represents the next generation of the well-established, aesthetic cements Variolink II and Variolink Veneer.
- Excellent shade stability thanks to the patented and reactive light initiator Ivocerin which is 100% amine-free
- Balanced and straightforward Effect shade system
- Lifelike fluorescence
- Easy, precise excess removal
- Flexible, situational consistency – ideal combination of flowability and stability
- Impressive radiodiagnostics

**Shades**
- Light++, Light, Neutral, Warm, Warm++

$110.00 REFILL

OPTRAGATE

OptraGate is a latex-free lip and cheek retractor. The aid’s unique flexibility and elasticity make it comfortable to wear and assist patients to keep their mouth open.

**Easy access to the cavity**
- Lips and cheeks are evenly retracted around the mouth
- Easily accessible, manageable treatment field
- Effective and quick relative isolation

**Relaxed and more efficient treatment procedure**
- Easy placement
- Increased concentration on the actual treatment procedure
- Relieves the work of the dental assistant and dentist
- Latex free

**High patient comfort of wear**
- 3-dimensional flexibility for a very good positioning
- Soft, flexible material with recesses to accommodate the upper and lower lip frenulum
- Good compatibility thanks to the latex-free material

Sizes
- Regular, Small and Junior Assorted

$231.00 EACH

MULTILINK AUTOMIX REFILL 9G

An adhesive luting system for the cementation of indirect restorations made of silicate and oxide ceramics (e.g. IPS e.max), metal and metal-ceramics as well as composites.
- Strong hold – both dual and self-curing
- Universal – suitable for silicate and oxide ceramics as well as metal
- Clinically proven – numerous long-term studies
- Avail. In: Transparent, Yellow, Opaque, White

$297.00 REFILL
ESTELITE POSTERIOR

Developed for optimal posterior restorations allows you to place dependable restorations with ideal handling, reliable physical strength and quick curing properties (10 seconds). By implementing Tokuyama’s patented innovative initiator system, “Radical Amplified Photopolymerisation (RAP) Technology” ESTELITE® POSTERIOR offers the clinician a reduced curing time without sacrificing working time.

Benefits
- Ideal handling - Optimal stiffness, easy to shape, non sticky
- Prominent physical strength - High flexural and compressive strength
- Exclusive posterior shade availability - PA1, PA2, PA3, PCE (Clear Enamel)
- Quick curing time - 10 seconds with a halogen light (≥400mW/cm²)
- Ample working time - 50 seconds under an ambient light (10,000 lx)

Indications
- Direct posterior restorations (including the occlusal surface)
- Repair of porcelain/composite

Irradiation time for Polymerisation
- Halogen 800mW/cm²: 5-10 sec.
- Plasma 950mW/cm²: 3 sec.
- LED 900mW/cm²: 5-10 sec.

$79.00 SYRINGE

BUY 4 + GET 1 FREE

ESTELITE BULK FILL FLOW

No capping layer needed – Highly aesthetic and strong all on its own

Thanks to its higher aesthetics and strength, Estelite Bulk Fill Flow requires no capping layer of another composite for restorations up to 4mm, offering faster and simpler restorations than the leading flowable bulk fills.

With improved cavity adaptation and lower shrinkage stress, Estelite Bulk Fill Flow offers restorations that are not only more aesthetic and stronger, but also more worry free.

BEAUTIFUL
- Higher shade matching
- More opaque when cured
- Higher glossiness

FASTER
- No capping layer or other composites needed
- 10 seconds of curing time

STRONGER
- High compressive strength
- Higher flexural strength
- Lower wear and abrasion

WORRY FREE
- Excellent cavity adaptation
- Minimal shrinkage stress
- More consistently cured

$77.00 SYRINGE $99.00 PLY

BUY 4 + GET 1 FREE
ESTELITE UNIVERSAL FLOW
RESIN-BASED DENTAL RESTORATIVE MATERIAL

EXCELLENT AESTHETICS
Wide and natural colour matching
ESTELITE UNIVERSAL FLOW is designed to allow for the restoration of most cases using single shade composites. This is due to its superior shade matching/colour blending effects.

The colour compatibility of ESTELITE UNIVERSAL FLOW A2 (see right) shade when it is filled in each artificial tooth (B1, A1, B2, A2, C1, A3) after creating a cavity 4mm in diameter and 2mm deep. By using black light, we can see the fluorescence of ESTELITE UNIVERSAL FLOW where it was filled.

HIGH LIGHT DIFFUSION
Estelite Universal Flow has the highest light diffusion by laser transmission test. It is possible to achieve wide colour matching and an invisible margin.

$110.00 PLIS MED ONLY $72.00 SYRINGE

THREE FLOWABILITY OPTIONS, EACH WITH EXCELLENT HANDLING PROPERTIES

TOKUYAMA ESTECEM II
Estecem II is a dual-cure (light and/or self-cure), radiopaque, adhesive resin cement system with excellent handling, aesthetic and adhesive properties to teeth and all prosthetic materials. The main components of the Estecem II are: Estecem II Paste (A/B) and Tokuyama Universal Bond (A/B). Tokuyama Universal Bond promotes the adhesion of Estecem II Paste to tooth structure. Tokuyama Universal Bond also enhances the adhesion of Estecem II Paste to all prosthetic materials without the use of a separate primers.

Indications
- Cementation of crowns, bridges, inlays, and onlays made of glass/oxide ceramics (porcelain, zirconia and alumina), metals/allloys (precious and non-precious) and resin materials including inorganic filler (composite materials)
- Repair of fractured porcelain fused to metal crowns and all ceramic restorations
- Cementation of veneers
- Cementation of adhesive bridges
- Cementation of metal or resin cores, metal or glass and quartz fibre posts

Characteristics
- Reliable Adhesion over time and with all prosthetic material
- Flexural Strength and Elastic Modulus as a guarantee of long durability of the cementation
- Superior aesthetics
- Ease of use, simple and fast removability of excess cement
- Colour Stability over time

ESTELITE SIGMA QUICK

The miracle match
Estelite Sigma Quick is a universal, supra-nano filled dental composite that utilises 100% spherical fillers (82% by weight/71% by volume). This unique world-class technology delivers a flexible shade matching process, exceptional esthetics and long-term wear resistance.

Simple
- Utilising supra-nano spherical fillers, one shade can invisibly blend within several shades.
- Creamy, non-sticky consistency for easy handling.
- Extended working time of 90 seconds under ambient light, with only 10 seconds light-curing.

Beautiful
- High diffusion and refraction of light results in a unique blending effect.
- Resists slumping for effortless sculpting.
- Exceptional polishability reaching over 90%* glossiness in only 60 seconds.

Lasting
- Reduced abrasion for long-term wear resistance.
- Low 1.3% linear shrinkage resists marginal leakage.
- Low shrinkage stress for lasting patient comfort.
- Retained levels of surface smoothness for a lasting polish.

Benefits
- Quick curing time - 10 sec. with a halogen light (>400mW/cm²)
- Extended working time - 90 sec. under ambient light (10,000 lx)
- Outstanding polishability
- High gloss retention over time
- Wide shade matching range (chameleon effect)
- High wear resistance
- Less wear to opposing teeth
- Low shrinkage
- Good radiopacity
- Available in 20 shades

Indications
- Anterior and posterior restorations
- Composite veneer
- Diastema closure
- Composite/porcelain repair

**INSTRUMENT REPROCESSING**

Transfer of contaminated instruments and sharps
- Instruments should be carried to the sterilising area in a cassette or in a container that is preferably lidded and puncture-proof, to minimize handling and prevent potential for a penetrating injury if the container is dropped.

**Remember: instruments must pass in one direction only from contaminated to clean!**

**Cleaning**
- Gross bioburden should be cleaned at chairside.
- Pre-cleaning saves time and ensures bioburden does not dry and harden on instruments making them more difficult to clean.

**Cleaning rotary nickel-titanium endodontic files:**
- Immediately after use remove stoppers and insert the files into a scouring sponge soaked with chlorhexidine gluconate aqueous solution;
- Clean the files by using 10 vigorous in-and-out strokes in the sponge;
- Place the files in a wire mesh basket and immerse in a suitable enzymatic cleaning solution for 30 minutes;
- Follow this by 15 minutes ultrasonification in the enzymatic cleaning solution;
- Drain and rinse in running water for 20 seconds;
- Proceed to steam sterilisation.

A dental practice intending to reprocess rotary NiTi endodontic files should closely follow the above protocol. If a dental practice quarantines rotary files for a single patient for a course of treatment for the one tooth, they should follow this validated protocol. Moreover, reprocessing of root canal files is for NiTi files only, not for stainless steel files which must be single-use.

---

**ET.FOAM Enzymatic Transportation Foam**
- Ready to use, instrument pre-cleaning solution
- Breaks down bioburden to speed up cleaning process
- Keeps soiled instruments moist
- Ideal for use prior to instrument washers — rinse prior to placing in instrument washer
- Neutral pH, non-corrosive formula will not harm most metals, plastics, rubber or corrugated tubing
- Free rinsing, enzyme boost

**$30.00 1L BOTTLE**

---

**GZYME Triple Enzymatic Ultrasonic Cleaner**
- Penetrates and removes organic matter from all surgical and dental instruments, as well as flexible and rigid scopes
- Quickly loosens and dissolves proteinaceous deposits
- Bacteriostatic to prevent additional microbial growth
- Neutral pH formula is mild on instruments
- Non-corrosive, low foaming, free-rinsing, economical

**$99.00 1L BOTTLE**

---

**GLEAM II Ultrasonic Cleaning Solution**
- Make your instruments shine
- Bacteriostatic to prevent additional microbial growth
- Will not harm stainless steel instruments
- Safe on hard plastics, glass and rubber
- Easy to use 2L Tip ‘N Measure bottle

**$66.00 2L BOTTLE**
**BUY 1 + GET 1 TUB GAMACIDE FREE**

---

**DENTA TRAY CLEAN Tray and Instrument Cleaner**
- Ideal for impression trays, spatulas and other instruments
- Can be used in ultrasonic machines
- No messy powder
- Safe for all plastics and non-oxidising metals

**$55.00 1L BOTTLE**
**SURGICAL MILK**
*Instrument Lubricant*
- Keeps instruments shiny and prevents dulling
- Clinically tested to be steam penetrable and steam sterilisable
- Effective in steam, cry or chemical vapour sterilisers
- Reduces instrument repair and replacement costs

**ENVIRONMENT**
- A neutral detergent and warm water solution or commercially packaged pre-moistened, neutral detergent wipes should be used for all routine and general cleaning.
- Neutral pH detergents are best for environmental cleaning because they are less likely than acid or alkaline detergents to damage metals such as stainless steel or to cause skin irritation.
- Neutral detergents also leave little residue on surfaces.
- The spittoon should be cleaned after each patient by wiping with neutral detergent using disposable paper towels.

**NED Neutral Detergent**
- Ideal for surface/equipment cleaning between patients
- Gentle surfactants remove soil and debris from surfaces without irritation to the hands or adverse effects on surfaces/equipment.
- Neutral pH, alcohol free, rinse free
- Non-toxic, non-ionic, biodegradable
- Soft, non-linting cloth
- 160x wipes – 15 x 17cm

**SUPERCLEAN**
*Ultrasonic Solution*
- Convenient ready to use pouch requires no measuring
- Formulated to lift and remove proteinaceous and other organic matter such as blood, mucus and tissue from dental instruments
- Bacteriostatic to prevent additional microbial growth
- Cleans rapidly in less than 1 minute
- Non-corrosive formula contains special rust inhibitors that will not harm stainless steel instruments

**MAD**
*Environment & Hard Surface Cleaning Wipes*
- Mildly alkaline detergent wipes
- Multi-purpose detergent for medical and dental applications
- Specially formulated for cleaning equipment and hard surfaces in clinical environments
- Environment and user friendly
- Replaces corrosive acids and hazardous solvents
- 160x wipes – 15 x 17cm

**GENIE PLUS**
*Cleaning Magic for Chairs*
- Cleans, sanitises, revitalises and neutralises odours
- Removes stubborn stains
- Alcohol free formula prevents drying or cracking of upholstery
- Specifically formulated for leather, using natural emollients and humectants that nourish and protect your chair
- Non-sticky formula leaves no residue and a non-slip surface when wiped dry
- Maximise the life of your chairs
- 160x wipes – 15 x 17cm
GERMX
Hard Surface Disinfectant – Hospital Grade Disinfectant with Claims
- A safe, effective ready-to-use bactericidal, fungicidal, virucidal and tuberculocidal disinfectant liquid
- Broad spectrum kill
- Destroys mildew, mould and fungi
- 5 Minute disinfection
- Pleasantly scented garden mint
- Neutral pH formula

$77.00 4L Bottle

WIPES NOUVEAU
Disinfectant Disposable Wipes – Hospital Grade Disinfectant
- A rapid ready-to-use hospital grade disinfectant wipe
- Lint free disinfectant cloth
- Easy-tear eyelet lid
+ durable cloth
- 160 x wipes – 13 x 15cm

$312.00 Carton (1x Tub + 11x Refills)

$26 Per Refill

GAMACIDE
Surface Disinfectant Cleaner – Instrument Grade Intermediate Level Disinfectant

GamaCide® is the ideal surface disinfectant for your cleaning and disinfecting needs. Made with your safety and convenience in mind, GamaCide® kills bacteria, viruses, TB and fungi with a single 3-minute contact time. GamaCide® can quickly and easily be applied to all dental surfaces for superior infection control. For use in hospitals, dental offices, surgical facilities, neonatal & infant care units, plasma pheresis and blood centers, GI/pulmonary endoscopy labs, dialysis units and other areas where strict control of cross contamination is critical.

- Can be applied to both hard and soft surfaces including: plastic, ceramic, stainless steel, chrome, acrylic, leather, vinyl, glass, Plexiglas®, and baked-on surfaces.
- Non-flammable. No special shipping or storage is required.
- Is non-sticky & leaves no hazardous chemical residue when used as directed. Dye-free
- Is compatible with most impression materials and dentures
- Is biodegradable.
- Can safely be disposed via standard waste disposal methods.

Effective
- Most effective broad spectrum kill available in Canada — exceeds healthcare guidelines and standards.
- Bactericidal, Fungicidal, Virucidal and Tuberculocidal
- GamaCide® effectively kills the following microorganisms at room temperature:
  - Mycobacterium terrae ATCC 15755
  - Staphylococcus aureus ATCC 6538
  - Pseudomonas aeruginosa ATCC 15442
  - Salmonella choleraesuis ATCC 10708
  - Poliovirus 1 strain Chat ATCC VR-1562
  - Influenza A viruses, including H1N1, Trichophyton mentagrophytes
  - ATCC 9533, Herpes Simplex 1 Virus

Fast
- Ready to use. No mixing or fussing.
- 3 Minute broad spectrum kill!
- Cleaning and disinfection in one solution.

**HOW D-VAC WORKS**

**Solid Organic Waste**
- Friendly bacteria emit enzymes.

**Enzymes liquify solid organic waste.**
- Friendly bacteria absorb liquified organic waste.

**CO₂, H₂O**
- After absorbing liquified waste, friendly bacteria give off harmless carbon dioxide and water by products.

**Bacteria multiply and continue this process until all solid organic waste is eliminated.**

---

**EVACUATION SYSTEM CLEANING**

**Clinical Problems Associated with Suction System Asepsis:**

1. **Hose Design.** Most hoses consist of series of convex & concave surfaces which provide operator with flexible, tangle-free line, but allow niches that harbour dried protein debris laden with microorganisms.

2. **Infrequent Flushing.** In most offices, flushing of lines is not performed after each patient treatment. Sporadic cleaning allows thorough drying of protein debris (blood & saliva) onto internal surface of lines; & protein provides protection & nutrients for microbial growth & reproduction.

3. **Short Contact Time of Cleaners.** When lines are flushed, contact time of materials used is too short to dislodge dried material & kill microorganisms. Culturing of lines in active dental operators showed counts up to 100 million organisms per millilitre of fluid.

4. **Popular Cleaners Do Not Remove.** Materials generally used for flushing lines, such as old instrument disinfecting solutions, household cleaners, & tap water are not effective.

---

**DUAL PURPOSE MICROBEX MICROVAC**

Evacuation System Cleaner + Ultrasonic Cleaning Solution

- 2 in 1 multipurpose cleaner with a unique low foaming multi-enzyme formula
- Effectively removes organic debris, bioburden and proteinaceous materials
- Routine use helps avoid costly line repairs and downtime
- Non-corrosive, neutralizes odours, phosphate free
- Economical

**$77.00 4L BOTTLE**

---

**D-VAC Evacuation System Cleaner**

- An environmentally friendly combination of enzyme-creating bacteria that immediately break down and "eat" organic matter, resulting in clean and deodorised suction lines
- Easy to use — measure, dilute and suction right from the bottle
- Works continuously, producing residual action between uses
- Contains no harsh or hazardous chemicals
- Non-foaming, amalgam separator friendly
- Safe on plastics, metals or carbon filters
- Mild formulation with pH range 7±1

**$55.00 2L BOTTLE**

**BUY 1 + GET 1 TUB GAMACIDE FREE**

E2O Dental Waterline Maintenance & Shock Treatment
- Safe to use, eco-friendly solution
- Biofilm & bacteria control
- No harsh chemicals
- Easy dose pump, no mess
- Liquid disperses quickly and evenly, no waiting for tablets to dissolve
- No clogging from tablet residue
- Patient will not taste grit in their mouth from undissolved tablets

$99.00 250ML BOTTLE

EILINE Water Quality Check Vial Kit
- Monitor water in office using test vials and a 37 degree dry block incubator
- 2 Vials per test: (1) Total bacteria + Fungi AND (2) E.coli + faecal coliform
- 1x 12 vials per kit

$154.00 KIT

**BIOFILM LIFE CYCLE**

Most dental unit waterlines contain biofilm that may be a source of known pathogens (e.g. Pseudomonas aeruginosa, nontuberculous mycobacteria & Legionella spp).

- Waterlines must be cleaned & disinfected as per manufacturer's instructions for use.
- Waterlines must be fitted with anti-retraction valves.

Bacteria aggregate and adhere

Recruitment of cells of different species

Slime and exopolysaccharides form – microcolony

Mature biofilm – a flowing system

BUFF
Prophylaxis Polishing Powder
- Removes heavy stains
- Anti-clogging "Aero Flow" agents for trouble-free performance in air polishing units
- No salty aftertaste
- Leaves mouth refreshed and clean

ALCOHOL-BASED HAND RUB

Dental staff must be educated on the correct use of ABHR and handwashing products, and caring for their hands.

- The Hand Hygiene Australia (HHA) protocol is to use an alcohol-based hand rub (ABHR) for all clinical situations where hands are visibly clean.
- The normal routine in dental practice should be for dental staff to use ABHR between patient appointments and during interruptions within the one appointment.
- ABHR is applied onto dry hands and rubbed on for 15–20 seconds, after which time the hands will be dry.
- Hand hygiene is required after removal of gloves. This must be done before the dental practitioner writes or types up patient notes. Hand gel is used again immediately before gloving for the next patient.
- ABHR must only be used on dry skin; wet hands dilute the product thus decreasing its effectiveness.
- Typically, suitable ABHR will contain a skin emollient to minimise the risk of skin irritation and drying, have minimal colour and fragrance, and will leave the hands in a dry state after being rubbed in for 15–20 seconds.
- Bottles of ABHR should not be ‘topped up’ because the outside of the dispenser may become contaminated. Empty dispensers should be discarded and not reused.

IC-GEL
Antibacterial Gel (ICGEL)
- 70% Ethanol
- Made with Chamomile + emollients to moisturise skin
- Dye free, non-staining, residue free
- Evaporates quickly

IC-Gel
BUY 2 + GET 1 FREE
$22.00 480ML BOTTLE

GERMI-STAT
Skin Cleanser
- Active ingredient chlorhexidine gluconate kills germs on contact and allows gel to be retained on the skin even after it is exposed to water
- Broad spectrum effectiveness against bacteria, yeasts, moulds and other pathogens
- Dye free, non staining, with mild formula

GerminStat
$110.00 4L BOTTLE

FLOAM Topical Fluoride Foam
- 1.23% Fluoride ion from 1.69% sodium fluoride + 0.5% hydrogen fluoride
- Reduces treatment time, rapid fluoride delivery within 1 minute
- Unique packaging maximises the use of entire contents
- Cost per treatment is less than gels
- Foam spreads easily for consistent coverage and remains in the tray, reducing mess and the risk of patient gagging and ingestion

FLOAM

Clinpro™ Tooth Crème
0.21% Sodium Fluoride
Anti-Cavity toothpaste with fTCP
650 ppm NaF with patented functionalised Tri-Calcium Phosphate (TCP) that remineralises the tooth and aids in the reversal of white spot lesions.

Clinpro™ White Varnish
5% Sodium Fluoride White Varnish
22,600 ppm NaF with patented functionalised tri-calcium phosphate (TCP) – flows smoothly and inter-proximally on moist or dry teeth and sets rapidly in the presence of saliva without any yellow colouring.

Clinpro™ XT Varnish
Fluoride-releasing durable coating that seals and protects dentine tubules to relieve hyper-sensitivity and lasts up to 6 months.

Clinpro™ Sealant
Patented colour-change technology – goes on pink to see placement, then cures to a natural white. Low viscosity and fluoride-releasing.

High Fluoride Toothpaste now available:

Clinpro™ 5000
1.1% Sodium Fluoride Anti-Cavity Toothpaste

Patient-friendly: Aids compliance.

Low abrasion:
Provides gentle, effective cleaning and is comfortable for patients to use even on exposed root surfaces.

One-step compliance:
Clinpro™ 5000 Anti-Cavity Toothpaste simply replaces your patient’s current brushing regimen.

Patient-friendly flavour:
Clinpro™ 5000 is available in a mild Vanilla Mint flavour, suitable for patients 6 years or older.

Convenient flip-top 113 g tube:
Lasts six months, so it’s easy to renew at each appointment.

DENTAVISION • MAY/JUNE 2019 | PAGE 33
ACHIEVE HAEMOSTASIS ... AESTHETICALLY

This viscous yet spreadable 25% aluminium chloride gel quickly stops minor bleeding and sulcular fluid without the mess of a liquid or paste.

Subgingival preparation and bleeding sulcus,
Rub haemostatic firmly against bleeding tissues. Achieve the most rapid haemostasis with the Metal Dento-infusor® tip. The clear gel allows easy visibility and rinses away quickly.
Press Ultracept® cord into gel in sulcus around tooth preparations. Leave 4–5 minutes.

- Specially designed for the aesthetic zone
- Transparent gel stays on the sulcus
- Leaves no residue and rinses off easily
- Does not interfere with bonding

6407 ViscoStat Clear Dento-Infusor IndiSpense Kit
1 x 30 ml IndiSpense syringe

6410 ViscoStat Clear Econo Refill
20 x 1.2 ml syringes

$143.00 KIT

ASTRINGEDEDENT® U11

Astringedent haemostatic is an aqueous, 15.5% ferric sulfate solution with a pH of ~1.0. It’s well suited for a variety of dental procedures, and because it’s more aqueous than other haemostatic agents, it’s ideal for soaking retraction cord.

- Known as the “classic” haemostatic agent
- Achieves profound haemostasis in seconds
- Eliminates sulcular fluid contamination for optimal bonding
- Decreases costly impression remakes

$60.50 BOTTLE
FLUORODOSE®
FluoroDose Fluoride Varnish with Xylitol

Clinicians love that this product is smooth – not stringy or clumpy, unlike other products on the market. This reduces the chances of clogging your practice’s vacuum lines. Patients love that it stays clear so there is no tooth discoloration. FluoroDose dries in seconds upon contact with saliva and remains on the tooth for 6 to 8 hours for optimum fluoride uptake.

FluoDose contains 5% sodium fluoride, the maximum dosage allowed in a convenient single-dose LolliPack®. Each unit contains one single dose (0.3mL) of FluoroDose plus one Benec® Brush applicator which allows you to mix the varnish prior to application, guaranteeing a consistent level of fluoride in every application. Simply peel back the cover, dip in the brush, mix and apply.

Centrix makes fluoride varnish safer and cleanup easier.

FEATURES
- Patients love the taste and feel of FluoroDose
- Unit-dose delivery allows for ease of use and cleanup
- Brush-on procedure is easier and safer to use than gels and rinses
- Dries in seconds upon contact with saliva
- Remains on tooth for 6 to 8 hours for optimum fluoride uptake
- Available in 5 great-tasting flavours: Caramel, Bubble Gum, Mint, Cherry and Melon
- 5% sodium fluoride (NaF) or 22,600 ppm of fluoride
- Contains Xylitol and Sucrose powder
- Best value on the market

Centrix makes asepsis and post-procedural cleanup easier.
No more messy gels and uncomfortable trays; no more inherent worry of fluoride ingestion.

ALLERGEN RISK INFORMATION
FluoDose is lactose free, gluten free and nut free. The product is free of all dairy, egg, gluten, soy, peanut, tree nuts, tree nut derivatives, fish/shellfish and seed products. FluoroDose contains resin and beeswax and red dye 40.

American Eagle Instruments® Inc
better DENTISTRY by DESIGN™

MADE IN THE USA

BLACKJACK PRO THIN™ SCALER

Clinicians asked and AEI answered – the very popular supragingival access instrument is now thinner, reaching all areas of supragingival calculus like never before. The light stroke of the modified scaling technique used with sharpen-free XP Technology makes it possible to design the Blackjack Pro Thin, as traditional lateral pressure could break an over-thinned working end. The Blackjack Pro Thin has the potential to replace all posterior and anterior sickle scalers, including the H6-7, streamlining preventive and periodontal treatment set ups.

M23 PRO THIN™ SCALER

The M23 Pro Thin allows for superior supra and interproximal adaptation and accessibility up to the contacts on all teeth. It also adapts to mesial and distal line angles of all teeth. Multi-surface adaptability saves time by allowing the operator to expedite scaling during a full mouth appointment. It’s versatility has the potential to replace all posterior and anterior sickle scalers, streamlining preventive and periodontal treatment set ups.

GRACEY ACCESS PRO THIN™ CURETTES

Gracey Access Pro Thin. Gracey design is the standard of care for complete pocket coverage deeper than 4 mm.

GRACEY ACCESS 1-2 PRO THIN CURETTE

GRACEY ACCESS 7-8 PRO THIN CURETTE

GRACEY ACCESS 13-14 PRO THIN CURETTE

GRACEY ACCESS 15-16 PRO THIN CURETTE

CLIP F
Light-curing filling material with fluoride for temporary restorations
- Easy to place – easy to remove in one piece
- No damage to preparation boundaries
- Time-saving and economical
- Tight margins and durable
- Specifically useful in inlay/onlay technique

$92.00 SYRINGE

BIFLUORID 10
Fluoride varnish for the treatment of dental hypersensitivity
- Immediately desensitising
- Formation of a protective coat against thermal and mechanical influences
- Transparent – no discoloration of teeth
- Special varnish base reinforces long-term effect and deep fluoridation
- Economical and simple – high yield, low cost, fast application
- Dries quickly
- Colophony-free
- Contains 5% sodium fluoride (equivalent to 22,400 ppm fluoride) and 5% calcium fluoride

$210.00 16G BOTTLE

FUTURABOND DC
Dual-curing self-etch-bond reinforced with nano-fillers
- Chemical-curing in areas inaccessible with a curing light
- Achieves the same adhesive properties as total-etch preparations without separate etching of the tooth substance
- Moisture-tolerant
- Durable marginal integrity
- Easy and fast application – one coat, one-cure technique
- Contains fluoride
- No refrigerated storage needed
- Ideal for paediatric use

$180.00 SINGLE DOSE 50

VOCO GRANDIO FLOW
Flowable universal nano-hybrid restorative material
- Optimal flowability
- High filler content of 80% w/w
- Exact shade match to Grandio
- Excellent wetting properties
- Microhybrid composite – like physical properties
- Significantly lower polymerisation shrinkage than conventional flowables
- Very good abrasion resistance
- High transverse strength
- Can be used with all conventional bonding agents

$136.00 CAPS

VOCO STRUCTUR 2 SC
Self-curing composite material for the fabrication of provisional crowns and bridges
- Simple and fast working steps
- Less than 1 minute setting time in the mouth
- Easy to shape and polish
- Available in 8 shades for natural aesthetics
- Long-lasting temporaries
- High stability of shape and shade
- Very economical due to minimal material loss
- Natural fluorescence

$178.00 EACH

VOCO GRANDIO
Universal nano-hybrid restorative material
- Excellent physical properties for long-lasting restorations
- Significantly lower polymerisation shrinkage than conventional composites
- High filler content of 87% w/w
- Extremely high abrasion resistance
- High transverse strength
- Smooth consistency
- Excellent aesthetics
- Can be used with all dentine/enamel bonding agents

$133.00 CAPS $127.00 SYRINGES
ADMIRA FUSION
Universal nano-hybrid ORMOCER restorative material

The worldwide first purely ceramic-based restorative material
- Pure Silicata Technology, i.e., fillers and resin matrix based purely on silicon oxide
- contains no classic monomers

Thanks to the most innovative ORMOCER technology
- by far the lowest polymerisation shrinkage (1.25 % by volume) and particularly low level of shrinkage stress in comparison to all conventional restorative composites
- inert, so excellent biocompatible and extremely resistant to discoloration

Completely universal – meeting highest demands in anterior and posterior regions
- perfect coordination of translucence with opacity for natural results
- the optimal selection of shades enables highly flexible working using either the single or multiple shade system

Excellent handling, simple high-lustre polishing procedure coupled with high surface hardness guarantee first-class long-term results

Compatible with all conventional bonding agents

$115.00 SYRINGE  $120.00 CAPSULES

VOCO PROFLUORID VARNISH
Desensitising varnish with fluorides

Hypersensitivity
Sensitive teeth are a widespread problem for a large number of people. Usually, the condition causes only transient pain which patients do not always report to their dentists. Hypersensitivity is mainly caused by exposed dentinal tubules. Therefore, the aim of treatment is to seal these tubules.

Indications
Profluorid Varnish is a fluoride-containing varnish for treating hypersensitivity. Dentinal tubules exposed on the necks of teeth or after cavity preparation are effectively sealed.

Components and effect of VOCO Profluorid® Varnish
Profluorid Varnish is a colophony-based varnish containing 5% sodium fluoride (22,600 ppm fluoride). The fluoride ion, together with the calcium ions accumulated in the tubules, causes a precipitation of calcium fluoride, which effectively seals the tubules. According to a user survey, over 95% of patients were completely free of pain after only one treatment with Profluorid Varnish.

As well as rapidly sealing the dentinal tubules, Profluorid Varnish also causes calcium fluoride deposits to form on the tooth surface. These deposits protect the tooth from acid attacks, promote remineralisation and contribute to the long-term formation of fluorapatite. Xylitol, which has a proven cariostatic effect in addition to its taste-enhancing properties, is also added to the varnish.

$55.00 10ML TUBE
**BIOSONIC® US100R**

**Advanced Ultrasonic Scaling System**
The BioSonic US100R Ultrasonic Scaler provides precise water flow control, a kink-resistant handpiece cord and suitable output power for your subgingival and supragingival hygienic scaling needs, keeping the patient’s comfort in mind. The US100R accommodates both 25 kHz and 30 kHz inserts, allowing either insert type to be used. A uni-directional foot pedal provides for easy operation.

BioSonic US100R Advanced Ultrasonic Scaling System
- BioSonic magnetostrictive Ultrasonic Scaler System automatically adjusts to work with any manufacturer’s 25 kHz or 30 kHz inserts
- Faster hard calculus removal with on-demand maximum power turbo boost button
- Ergonomic handpiece improves operator’s comfort during extended scaling
- Smallest footprint minimizes counter space requirements
- BioSonic Inserts - variety of most popular tip designs in both 25 kHz and 30 kHz
- Better performance reliability and longevity through patented manufacturing process

**BIOSONIC® UC150**

Your patients trust you. You can trust BioSonic.

**VERSATILITY**
- Small footprint to maximise counter space
- Can be used as counter top or recessed
- Multiple cleaning configurations

**CONVENIENCE**
- Quiet operation
- Glove friendly touch screen
- Even cleaning with frequency sweep function

**EFFICIENCY**
- USB interface and data logging
- Fits multiple cassettes or beakers
- Heater function

- Max speed: 168,000 min⁻¹
- For FG burs (ø1.6)
- Two-way spray function

**X450L – Optic**
- Order Code: P1078
- Connect to NSK Couplings
- Power: 21W
- Speed: 380,000-450,000 min⁻¹
- Head Size: ø11.2 x H13.5 mm
- For FG extra-long burs (25mm) only
- Triple water jet

**3M ELIPAR™ DEEPCURE-S LED CURING LIGHT**
- A predictable, reliable cure, even at the bottom of the proximal box
- Significantly better depth of cure even when light positioning is difficult
- Better light uniformity and intensity distribution at clinically relevant distances
- Updated light guide geometry allows easy access to all tooth surfaces
- The angle of the light guide is designed to make it more comfortable for patients even if they have limited mouth-opening abilities
- One-piece, high-quality stainless steel casing is robust and easy to disinfect
- Simple two-button operation with one cure mode for all indications
- Charging base with built-in light intensity meter and battery charge indicator

**3M ELIPAR™ DEEPCURE-L LED CURING LIGHT**
- For fast, reliable and effective curing, the Elipar™ Deep Cure-L Curing Light offers great value. Includes one curing light handpiece, charger, 10mm light guide, eye shield and three curing discs.
- Economical, lightweight plastic model
- A predictable, reliable cure, even at the bottom of the proximal box
- Better depth of cure when perfect light positioning is difficult*
- 120 minutes of cure time from a full charge
- Simple two-button operation with one cure mode for all indications
- Built-in battery with charging plug
- Lightweight, vent-free plastic housing for easy disinfection
- Cordless portability with 120 minutes of cure time from a full charge

**KERR DEMI™ ULTRA LED**
The Demi Ultra LED builds upon our legacy and continues to offer the same compelling features that have made the Demi curing light such a commercial success, including:
- Lightweight, ergonomic design
- Interchangeable Light Guides
- Whisper-quiet fan
- Multiple Curing Options
- Periodic Level Shifting

**Kerr ENDODONTICS**

**SOFTLY 8 AMALGAMATOR**
- Universal Activator for digital predosed amalgam capsule
- With micro-processor that ensures the accuracy and repeatability of the selected time
- Stable, quiet and easy to clean
- 4000RPM vibration frequency

**Preventative**

**GERMIPHENE GEL 7 MINT FLUORIDE**  
*(GMINT)*  
The Gentle 2% Sodium Fluoride gel Ideal for any patient

Gel 7 is especially indicated for use with patients that have a reduced salivary flow due to Chemotherapy, radiation or who may be taking medications that cause xerostomia.

The gentle formulation is both safe for delicate oral tissues, root exposures and titanium implants.

Gel 7 is an ideal fluoride therapy for adults as it aids in the protection of recurrent caries and protects Porcelain margins protecting crown and bridge work.

**BUY 2X GEL 7 + GET 1X PACK GELTRAYS FREE**

**$44.00 456ML BOTTLE**

**$66.00 BOTTLE**

**FLOAM TOPICAL FOAM FLUORIDE**

An efficient, fast acting topical fluoride that ensures maximum fluoride uptake in just one minute!

Aerosol Floam topical fluoride is a powerful line of defence against dental cavities. Highly effective, Floam acts fast to ensure maximum fluoride uptake in just one minute.

Floam’s streamlined dispersing action releases thousands of bubbles that rest on the surface of the tooth to continuously supply fluoride across the enamel and the interproximal space. It clears easily and quickly from the mouth and will not clog suction systems.

Floam has a light and airy consistency and is pleasantly flavoured with no bitter after-taste.

Floam is a cost effective way to carry out fluoride treatments. Compared to traditional gels, the foam texture provides a much more pleasant experience for both adults and children.

INTRODUCING
THE WHITENING
THERAPY RANGE

ORAL-B 3D WHITE WHITENING
THERAPY ENAMEL CARE
Strengthens the enamel with its Sodium Fluoride formula and uses Dual Silica+ Glass-H technology to remove surface stains. Dual Silica safely removes soft and hard surface stains and the Glass-H technology helps to prevent against future stains.

ORAL-B 3D WHITE WHITENING
THERAPY SENSITIVITY CARE
Is suitable for sensitive teeth with a moderate single Silica+ Potassium Nitrate formula. The Smooth Silica gently lifts away surface stains during brushing while Potassium Nitrate helps relieve from sensitivity.

WHITENING SHOPPERS

- Believe whiter teeth are important, but so is the health of their teeth.
- They don't want to compromise the health of their teeth for a product that wears down their enamel.
- Currently, they believe that there is a trade-off between whitening efficacy and the health and safety of their teeth.

HOW ORAL-B 3D WHITE WHITENING THERAPY WORKS

Oral-B 3D White Whitening Therapy is made from an Active Mineral Complex which targets stains & gently lifts them from the teeth.

- SODIUM FLUORIDE: Replenishes tooth enamel to strengthen teeth
- POLISHING SILICA: Gently removes surface stains for healthy and beautiful teeth
- RICH SURFACTANT: Creamy foam to leave teeth feeling pampered and healthy
GENIUS 9000

Know you’re getting a superior clean* with the Oral-B GENIUS 9000 electric toothbrush. This highly advanced brush features a dentist-inspired round head that surrounds and cups each tooth with dynamic oscillating, rotating and pulsating movements to remove up to 100% more plaque than a regular manual toothbrush.

*vs a regular manual toothbrush

OSCILLATING-ROTATING-PULSATING TECHNOLOGY
and dentist-inspired round brush head clean tooth by-tooth, reaching areas that are often missed by differently shaped brush heads

PRESSURE SENSOR
The Smart Ring illuminates to alert you when you brush too hard while speed decreases and pulsations stop

PROFESSIONAL TIMER
The built-in 2 minute timer helps you brush the right amount, with a timer for each zone of your mouth

POSITION DETECTION
The advanced Position Detection technology of the GENIUS 9000 allows you to see where you’re brushing so you can adjust your technique and never miss a zone

INTELLIGENT BRUSH FOR REAL-TIME FEEDBACK
Download the Oral-B App on your smartphone and use Bluetooth technology to get real-time feedback while you clean for improved brushing habits

CUSTOMISABLE SMARTRING
Visible from every angle while brushing, the SmartRing allows you to see feedback from the pressure indicator, brushing timer and Bluetooth connection with ease. It can also be programmed through the Oral-B smartphone app to illuminate with your choice of 12 colours as you brush

DUAL CHARGING & EXTRA-LONG BATTERY LIFE
features a cutting-edge Lithium Ion battery and smart travel case that’s designed to charge both your toothbrush and smartphone using only one outlet, all while delivering long-lasting, consistently powerful cleaning action for up to 12 days between charges

$175.00 EACH

ACE STEEL ROUND PLAIN CUT BURS

Ace Classic Steel burs are purpose built for general dentistry tasks, ideal for cavity preparation and dentine removal. Ace Classic Steel burs combine detailed crosscut designs with the highest quality alloy steel. Robust and flexible, Ace Classic Steel burs are strong enough to cut through crowns and sensitive enough not to shatter porcelain.

BUY 4 + GET 1 FREE

Steel burs are heat treated to 750 on the Vickers hardness scale for improved cutting efficiency.

Our unique rust inhibiting coating prevents corrosion.

Perfectly balanced to reduce vibration and prolong life of hand piece.

ZIZINE ZIAGEL

Cherry flavoured translucent colourless gel
Zizine Ziagel is a Topical Dental Anaesthetic.

What it is used for
Cherry flavoured topical anaesthetic for the oral mucosa for use in children and adults when mint is contra-indicated to assist during dental procedures. Desensitisises the mucous membranes prior to injections. Surface anaesthesia for the extirpation of deciduous teeth. Abscess incisions below the mucous membrane. Extraction of teeth with advanced periodontitis, allows adjustment and fitting of crowns and bridges. Allows Subgingival scaling.

How to use
Zigel gingival gel should be applied on the mucosa previously dried. The gel is applied according to the designed instructions using a cotton pellet at the rate of 0.10 to 0.20g of finished product per application 5 to 10mg of Lignocaine per application.

Features and benefits
- Gel consistency prevents wash away to improve activity
- Improves patient comfort during many procedures
- Cherry flavour

$77.00 EACH

ZIZINE ATO LIDOCAINE 2%

Zizine ATO Lidocaine 2% is a lignocaine and adrenaline injection dental block or infiltration.

What it is used for
Lignocaine solutions are indicated for the production of local anaesthesia in routine dental procedures and oral surgery by means of infiltration and nerve block techniques. Lignocaine solutions with adrenaline are recommended for oral surgery requiring prolonged duration of anaesthesia and haemostasis.

Indications
- Adrenaline 1:80,000
- Producing deep anaesthesia well tolerated by tissues with minimal toxicity
- 45 mins - infiltration
- 60 mins - block
- Long shelf life
- The standard Australian anaesthetic
- Glass mylar wrapped cartridges, eliminates risk of shattering
- Improves safety
- Terminal sterilised - the highest degree of sterility for safety
- 100% latex free including packaging
- 2.2ml aspirating cartridges

BUY 3 + GET AN ASPIRATING SYRINGE FREE

ZIZINE ATO MEPIVICAIN 3%

- Rapid onset - 1.5 – 2 minutes
- Safe for paediatric patients • Safe for geriatric patients
- Longer duration of pulpal anaesthesia than other locals without a vasoconstrictor
- Recommended for use in patients where a vasoconstrictor is not indicated (at risk patients)
- Recommended for use in patients where lengthy pulpal anaesthesia is not required
- DPA infiltration – 20-30 minutes Block – 45-60 minutes
- Short post anaesthetic period – approx 2 hours

elements™ free
CORDLESS CONTINUOUS WAVE OBTURATION

Obturation is a critical step in the root canal procedure as it helps to prevent leakage, entomb remaining bacteria and reduce the chance of reinfection. The elements™free obturation system was designed to be used with the Continuous Wave warm vertical condensation technique. Its cordless design gives dentists the freedom and flexibility to perform predictable high quality 3D endodontic obturation without cords or wires getting in the way. This elements™free obturation system offers both Backfill and Downpack handpieces.

The Backfill handpiece features
- Motorised extrusion and built-in finger grips for more ergonomic handling
- Effective aerogel insulation offers a high level of protection against heat

The Downpack handpiece features
- Precise digital temperature control with rapid heating and adjustable heating range.
- 360° activation switch and cordless design improves your experience by allowing full range positioning of the handpiece for those difficult-to-reach canals.

Both backfill and downpack handpieces were designed to be used intuitively and at the quick press of a button. Simply power on the Downpack handpiece and select the temperature. It has a wide temperature range, from 140 to 400°C, so you can dial-in the precise temperature that works best for the obturation material of your choosing. The Backfill handpiece uses a needle with cartridge containing gutta percha material. This makes for easy set-up, friendly handling and eliminates the risk of cross-contamination when cartridge is disposed of after a single patient use. Simply push the button to activate the motor and begin extruding filling material into the canal.

**ART BY RISKONTROL™**

Infection Control Triplex Syringe Tips
- 4 Disposable
- 4 Non sterile single use, protecting you and your patients
- 4 Adaptors available to suit all major brands of equipment

Using Riskontrol air/water syringe tips protects practitioners and their patients against risks of direct or cross-contamination and eliminates the risk of microbial migration into the dental unit’s air and water lines.

These flexible, bendable, single-use tips without shape memory are practical, quick to fit and remove. It is no longer necessary to clean, decontaminate and sterilise the original tip of your air/water syringe (or ensure its traceability), which will save you a considerable amount of time. Riskontrol can be used on all types of syringes; a Riskontrol adaptor is available for all brands of equipment.

**EXPASYL**

HIGH Precision Gingival Retraction made EASY!
Expasyl benefits from an excellent risk-benefit balance: its viscosity has been specifically calculated to effectively open the sulcus without damaging the epithelial attachment. The quality of opening is the same as this obtained with a cord. Without lesion, resumption of bleeding or pain. Your movement is both safe and efficient. No need to wait for tissue healing since they are perfectly preserved. With Expasyl the impression is high precision. The prosthesis is natural, aesthetic, perfectly adjusted. The gum is respected.

**Buy 3 x Boxes (20 Capsules) of Expasyl**
GET 1x BOX (20 CAPSULES) EXPASYL AND 1x BOX EXPASYL TIPS

**Buy 1x Expasy Mini Kit**
GET 1x BOX (20 CAPSULES)

**Sterilisation**

**Browne Helix Test**

BR3780

A successful Browne TST Helix test confirms steam penetration through the helix and confirms by implication that air and other non-condensable gases have been removed.

The chemical indicator located in the capsule will show a defined colour change from yellow to dark blue/purple when exposed to a specific combination of time, temperature and steam. When all air has been removed from the steriliser chamber, steam will penetrate through the helix and the indicator will show a uniform colour change. If air or non-condensable gases are present they will impair contact between the steam and the indicator resulting in a non-uniform colour change; distinct yellow markings will be evident on the indicator.

- Each: $220.00

**3M™ Attest™ Biological Indicator (Pack 25)**

12629
- Biological indicator vials are easy to use and interpret with visual colour readout in 48 hours.
- Self-contained biological indicators significantly reduce possibility of contamination, minimising false positives and assuring more accurate results.
- Can eliminate recalls when used in every load.

- Each: $176.00
